QUALIFICATION

- User Interface (UI) Design : Creating visually appealing layouts and elements, ensuring a user-friendly experience. This involves choosing color schemes, typography, and arranging content in a way that is both functional and attractive.

- User Experience (UX) Design*: Designing websites that are easy to navigate and intuitive. This includes organizing the structure of the site, ensuring fast loading times, and considering the flow of interactions to provide an efficient and satisfying experience for users.

- Responsive Design*: Ensuring the website is accessible and looks good on a variety of devices, including desktops, tablets, and smartphones. This involves using flexible grids, layouts, and media queries to adapt the design for different screen sizes.
